

# Training Series for Tribal First Clients

## 2025-26 Policy Year

Tribal First will be offering a new series aimed at educating our clients in areas of property risk management and occupational safety and health. To register for one of our one-hour sessions, click on the title.

August 27, 2025	<p><b><u>Improving Underwriter Perception in a Hard Property Market</u></b></p> <p>The property and casualty insurance market has encountered significant losses in the past years leading to increased caution and reduced capacity. Take a minute to learn how you can enhance efforts to meet underwriter loss control expectations in a hard market.</p>
September 10, 2025	<p><b><u>Purposeful Inspections</u></b></p> <p>Structured property inspections ensure safety and compliance. You'll learn what to do with this data and how to best position your organization to sustain safe work conditions in a dynamic environment.</p>
October 8, 2025	<p><b><u>Preparing for the Storm – Are you Ready for “Old Man Winter”</u></b></p> <p>The pending winter season is upon us. We'll share tips that will help safety and property management professionals survive forecasted weather extremes.</p>
November 12, 2025	<p><b><u>Reducing the Potential for Active Assailant Occurrence and Improving Employee Survivability if Disaster Strikes</u></b></p> <p>Are you doing all you can to increase your odds of preventing a workplace violence event? This session will address ways you can reduce the potential for occurrence in your facility.</p>
December 10, 2025	<p><b><u>Optimizing Facility Life Safety</u></b></p> <p>Disaster can strike at any time, any place. We'll uncover common misconceptions and findings that increase occupant safety odds should the unthinkable happen.</p>
January 14, 2026	<p><b><u>Updating Your Emergency Action Plan</u></b></p> <p>What emerging risks historically not present in the workplace are missing from your Emergency Action Plan? Find out what these risks are and how to maintain operational continuity.</p>
February 11, 2026	<p><b><u>Understanding and Ensuring Functionality of Critical Fire Sprinkler Components</u></b></p> <p>Proper inspection, testing and maintenance (ITM) of your fire protection system is important to understand. Join us for a "101" class that will teach you what you need to know and why proper ITM is critical to ensure system functionality.</p>
March 11, 2026	<p><b><u>Fire and Security Alarm Function and Maintenance</u></b></p> <p>Alarm systems provide critical alerts to both occupants and emergency services. If these systems fail the consequences may be fatal. Get up to speed on alarm system functionality, attributes and management in this important one-hour class.</p>
May 13, 2026	<p><b><u>Fixed Systems and Extinguishing Agents</u></b></p> <p>Whether water-based, chemical, or foam, fixed fire suppression systems have one goal: suppress or extinguish a fire. We'll be breaking down each type, discussing benefits and limitations, and sharing steps to ensure successful operation.</p>
June 10, 2026	<p><b><u>Aging Commercial Facilities – Exploring the Risks of Aging Structures</u></b></p> <p>Are your buildings having a midlife crisis? Structures erected from the mid to latter 20<sup>th</sup> century may be “wearing out”. We'll explore how to proactively address the components of buildings’ electrical, plumbing, fire suppression, roofing, appliances, water heaters, and more.</p>

All training sessions being at 10am PT and are approximately 60 minutes. You may register for any of the topics by clicking on the title to be directed to the registration page. All presentations are recorded for on-demand playback – register to ensure you receive an e-mail with the link to the post-event recording).
